NBR Applications
Distribution Planning & Design

Gentlemen:

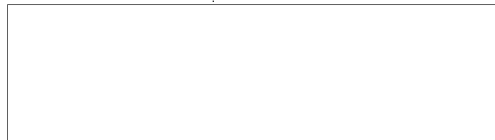

Reference is made to your letter of 3 December 1984 with regard to 2-inch gas service within the CIA compound. Please be advised that the pipe routing indicated on your drawings B-42482-5 and -6 is not correct. The desired routing is via the north side rather than the south side as indicated. Since the north side of the site is presently undergoing major cut and fill operations, the installation of this line should probably be delayed until 1986 or 1987.

STAT

Please call me [redacted] if you have any questions on this matter.

Sincerely,

Dear

Enclosed you will find four (4) copies each of our drawings B-42482-5 and 6.

STAT
STAT

We hereby request permission to install 2055' of 2" plastic high pressure service as detailed on the above drawings. This service is being installed to provide gas service to the incinerator building addressed as

All reasonable precautions will be taken to protect government property and restoration will be made to all disturbed areas.

Your earliest reply would be greatly appreciated. If there are any questions or problems, please call me at (703) 750-5149.

Thank you,

R. A. Gillespie, Jr.
